AMENDMENTS TO THE CLAIMS:

This listing of claims replaces all prior versions and listings of claims in the

application:

LISTING OF CLAIMS:

1. (Currently Amended) A fabric product comprising:

a fabric layer having a plurality of high strength and high modulus fibers, the plurality of

fibers impregnated by an impregnation compound with the fabric layer coated on each side with

the impregnation compound, where the impregnation compound is derived from a mixture

comprising:

a pre-polymer;

a co-reactant curative; and

a diluent, said diluent solvating the mixture of said pre-polymer and said curative,

and wherein said impregnation compound has a curative stoichiometry range of less than

85 percent.

2. (Previously Amended) The fabric product of claim 1 wherein said impregnation

compound has a curative stoichiometry range of approximately 75 percent.

Filed: February 5, 2004

Page : 3 of 9

3. (Currently Amended) The fabric product of claim 1 wherein a ratio of said mixture emprises a the co-reactant to the pre-polymer is about having an amount of 100.0 to 26.1 parts by weight.

Claim 4 (Cancelled)

- 5. (Currently Amended) The fabric product of claim 1 wherein the pre-polymer comprises a urethane pre-polymer.
- 6. (Previously Amended) The fabric product of claim 1 wherein said diluent comprises a solvent.
- 7. (Currently Amended) The fabric product of claim 3 [[1]] wherein the ratio of said curative to said pre-polymer is derived from the formula

$$\frac{6.34x0.75x230}{42}$$
 = parts by weight of curative per 100 parts of pre-polymer

where the pre-polymer comprises an isocynate and where 6.34 is the isocynate content of the pre-polymer, 0.75 is the desired stoichiometry of the mixture, 230 is the equivalent weight of the curative and 42 is the equivalent weight of the isocynate.

Claims 8 to 18. (Cancelled)

19. (Currently Amended) A fabric product comprising at least one resin fabric piece, said

resin fabric piece comprising:

a resin impregnated fabric layer comprising high strength and high modulus fibers and

having a resin impregnated therein;

a first resin layer having a resin disposed on a first side of said resin impregnated fabric

layer; and

a second resin layer having a resin disposed on a second side of said resin impregnated

fabric layer, wherein the resin is derived from a mixture comprising:

a pre-polymer;

a co-reactant curative; and

a diluent, said diluent solvating the mixture of said pre-polymer and said curative,

and wherein said impregnation compound has a curative stoichiometry range of less than

85 percent.

20. (Original) The fabric product of claim 19 wherein said resin has a curative

stoichiometry range of approximately 75 percent.

21. (Previously Amended) The fabric product of claim 19 wherein said resin has a ratio

of said curative to said pre-polymer in accordance with the formula

 $\frac{6.34x0.75x230}{42}$ = parts by weight of curative per 100 parts of pre-polymer

Applicants: Elsworth et al. Attorney's Docket No.: RTN-194AUS

where the pre-polymer comprises an isocynate and where 6.34 is the isocynate content of

the pre-polymer, 0.75 is the desired stoichiometry of the mixture, 230 is the equivalent weight of

the curative and 42 is the equivalent weight of the isocynate.

22. (Previously Amended) The fabric product of claim 19 further comprising a second

resin fabric piece disposed along a surface of said second resin layer.

23 (New) The fabric product of claim 1 wherein the high strength and high modulus

fibers comprise aramid fibers.

24. (New) The fabric product of claim 23 wherein the aramid fibers comprise polyaramid

polyparaphenylene terephthalamide fibers.

25. (New) The fabric product of claim 1 wherein the high strength and high modulus

fibers comprise aromatic polyester fibers.

26. (New) The fabric product of claim 25 wherein the aromatic polyester fibers comprise

polyester-polyarylate fibers.

27. (New) The fabric product of claim 19 wherein the high strength and high modulus

fibers comprise aramid fibers.

28. (New) The fabric product of claim 27 wherein the aramid fibers comprise polyaramid polyparaphenylene terephthalamide fibers.

- 29. (New) The fabric product of claim 19 wherein the high strength and high modulus fibers comprise aromatic polyester fibers.
- 30. (New) The fabric product of claim 29 wherein the aromatic polyester fibers comprise polyester-polyarylate fibers.
